(1950) Department.

Ns SERIES.

G.O. NO. 3244 Edn.

Dated 6 12. 50

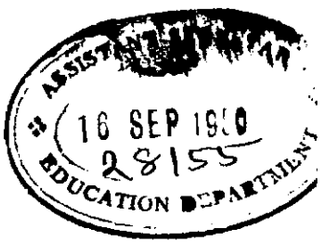
[Despatch Abstract.]

From

The Director of Public Instruction,
Madras.

To

The Secretary to Government,
Education Department,
M A D R A S.



Sir,

RC.No.1283 M1/49 dated 12-9-1950.

Sub:-Buildings-Government College, Mangalore-Construction of additional buildings and laboratories for the introduction of Physics (Main) and Chemistry (Main) under Part III of the B.A. course-Proposals-Submitted.

I have the honour to submit herewith proposals for the construction of a new storied block of buildings measuring 80' x 33' at a cost of Rs 50,000 for the introduction of Physics (Main) and Chemistry Main under Part III of the B.A. course in the Government College, Mangalore and request that Government may be pleased to accord their approval providing necessary funds for the same in Part II of the Budget Estimates 1951-52.

In G.O.Ms.No.1281 Education dated 28-4-1950, the Government have accorded sanction for the [illegible] Group II Mathematics with Physics subsidiary under Part III of the B.A. course in the Government College, Mangalore with effect from 1950-51. The laboratory facilities for science courses in the College are quite inadequate and although there is no immediate necessity for the starting of these courses, it is necessary to provide additional facilities to start the Pre-University classes of M.Sc. Physics and Chemistry (Main) in the Government College, Mangalore. The Principal has stated that by opening Chemistry (Main) for the B.A. degree we are giving an opportunity for the students who pass their intermediate in Science to continue their higher studies in this district itself and this would be a very important landmark in the history of South Kanara District. But it is not however possible to start the new courses without providing additional accommodation. As there is already provision for the teaching of Physics (Subsidiary) under part III of the B.A. course, the proposal to construct a new storied block of buildings measuring 80' x 33' at a cost of Rs.50,000 in 1951-52 for the introduction of Physics (Main) and Chemistry under Part III of the B.A. course in 1952-53, is approved. A rough sketch of the proposed [illegible] is also enclosed.

Yours [illegible],

For Director of Public Instruction.

Ltr to PI No. 1283 K1/149 of 12

Secy No. 3244 Edn dated 6-12-50.

The DPI is informed that we decided that ~~the~~ the Contained in his letter we should be deferred.

Initials

Colleges Govt College, Mangalore
Constrn of addl buildings and laboratories.

From the DPI no. 1283 K1/49 of 12.9.50

In connection with the Part II Schemes for 1950-'51, the DPI submitted proposals for opening new courses of study, and construction of necessary buildings for them, in the Govt College, Mangalore. In G.O. no. 1281 Edn of 20.4.'50, the Govt sanctioned the opening of Groups II. Maths with Physics subsidiary under Part III of the B.A. Course from 1950-51. The rest of the proposals were deferred.

2. The DPI has now renewed the proposal for the constrn of a block of buildings at a cost of Rs 50,000, for consideration as a Part II Scheme for 1951-5. The intention is that when the building is completed in 1952, new courses of study viz. Physics and Chemistry as main under Part III of B.A. Course, are to be introduced in the College from the academic year 1952-'53. It is stated that these courses cannot be introduced without first constructing necessary buildings. Hence the present proposal and it has therefore to be considered also from the point of view whether the Govt can provide sufficient funds in 1952-'53 for the introduction of these subjects in the College. Information regarding the cost involved in introducing these courses is not available. Pont being Services subjects, these must be considered

3. It may be stated that for the years from 1868 to 1948 the College continued to

be a 2nd grade one. In 1948, it was raised to 1st grade. It now provides facilities for B.Com degree Course and under B.A. Course, offers instructions in Mathematics, Maths (main) and Physics (subsidiary) (intro in the current yr) and Economics & History. It is stated that the existing facilities for Science Courses in the district are quite inadequate, the St. Aloysius College being the only institution which provides B.Sc Courses but with very limited accommodation.

4. In the existing financial stringency though it is difficult to support the proposal for buildings. However accommodation in the College is stated to be very insufficient and introduction of Science Courses in future years is impossible without Construn of addl buildings. And unless a beginning is made now in this direction the introduction of Science Courses will be postponed further. In this regard, the Construn of buildings proposed by the WPI at a cost of Rs 50,000 can be considered to be an essential Scheme and it is for orders whether this Wpth may suggested its Consideration as a Part of Scheme for 1951-52.

H.

The remarks of this may be invited before circulation

Part II Scheme for 1951-52

Government College - Mangalore - Construction of additional buildings and laboratories.
Estimated Cost Rs.50,000

....

Last year, the D.P.I. submitted a proposa for providing additional accommodation in the Govt. College, Mangalore, in order that B.Sc.Physics and Chemistry Main and Subsidiary Courses might be opene in the College. The cost of the works was then estimated at Rs 97,000. The Government ~~however~~ deferred the proposal, in view of the financial strin gency.

The D.P.I. has now renewed the proposal for construction of a block of buildings in the College at an estimated cost of Rs 50,000 for conside tion as a Part II Scheme for 1951-52. The intentior is that when the building is completed in 1952, new courses of study, viz. PHysics and Chemistry as mair under Part III of the B.A.Course, ~~are to~~ would be introduc in the College from the acamedic year 1952-53.

In view of the continued and pressing need for economy, only those schemes which are considered to be really and immediately essential for the proper running of any Department are to be treated as Part II Schemes for 1951-52. Construction of additional buildings in the college next year for the introduction of Science courses in future years cannot be considered to be imperatively essential. Building schemes are also generally deferred in view of the high cost of materials and labour, unless they are considered to be absolutely essential. Finance may therefore suggest that the proposal may again be deferred.
